# STAINLESS STEEL WALLET

STEWART/STAND® is a privately held design company established by brothers Theo + Paul Stewart-Stand, now headquartered in San Diego, CA. The company designs, markets and sells design-led men's and women's accessories and other original lifestyle products to customers worldwide. Through their flagship store and retail partners in the US, Europe and Asian markets, this American design company has expanded far beyond its Brooklyn, NY origins - since 2002.

STEWART/STAND® has gained a reputation for producing innovative accessories for men and women with quality and craftsmanship that is unmatched in material, interest + style.

# [ TEXTURE COLLECTION ]

Textured stainless steel makes a bold statement in a variety of geometric patterns. Composed of our custom textured stainless steel textile + accented with a casual silver nylon at the spine + in the interior.

Designed in 2005. The discovery, refinement and development of our signature stainless steel material coincided with the seminal exhibition at The Cooper-Hewitt National Design Museum in New York. The title of the exhibition: Extreme Textiles.

*be*ORIGINAL™  
Member

The stainless steel wallet is an original design. As a member of beOriginal Americas, STEWART/STAND supports the effort to educate the public on the value of authentic design.

Around the time of the exhibition we began developing the material for our specific applications and fell in love with both the touch and handle of the material. We sensed a tremendous opportunity at the intersection of fashion and technology.

**PATENT PARTY** / A time to celebrate: Focus, vision + a clarity for originality. A patent titled, "Wallet Composed of Steel Fabric" 8.820.368 has been granted, conceived 10 years ago. As our exclusive right, we will continue to design, develop + innovate because we truly believe "the last thing the world needed was another leather wallet."

# SLIM LINE

The Slim Line wallets are the thinnest full bill fold wallet we make.

Slides easily into your front or back pocket. Textured stainless steel on the front and premium full-grain leather on the spine + the back. An extra stash pocket on the exterior allows for easy access to your most important credit cards, ID or metro cards.

We use the finest quality full-grain leather, favored for its elegance and strength. An enriched leather provides for a smooth, tight + supple hand.

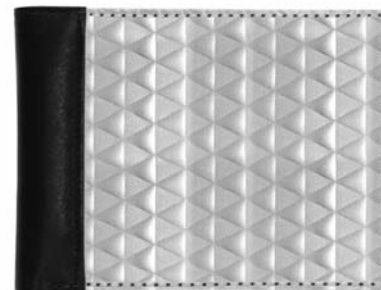

A geometric pattern adds dimension to the reflective nature of our stainless steel textile. Shadows and shading influence the appearance of these patterns as light pours over the beveled surface.

14

# LEATHER TECH COLLECTION

Slick, sophisticated, sport-driven + technically intricate. A tasteful blend of leather and stainless steel is paired with a casual nylon. We use the finest quality full-grain leather. An enriched leather provides for a smooth, tight and supple hand. Like our stainless steel fabric, it is favored for its elegance + strength.

Extreme Textiles:  
Designing for High  
Performance

As strong as steel. Strong enough to protect astronauts from meteorite showers during EVA's on the lunar surface or while in free space.

A super compact wallet, an ultra thin design. Lighter than leather since 2005.

The stainless steel wallet was developed by STEWART/STAND and we remain the only design company producing the tailored craftsmanship required while working with stainless steel textiles.

**A FINER WALLET** / If you could imagine "a finer wallet" what would it include? Would it circumvent electronic pick pockets? The finest wallet would include the highest standards in quality, precision + authenticity. Instead of traditional leather, adding materials with increased durability + a lighter composition would be ideal. Exclusively ours, STEWART/STAND® is committed to manufacturing "a finer wallet" which embodies these concepts.

## LEATHER EXTERIOR / REPEAT STRIPE

Light absorbing leather is paired with our illuminating stainless steel. Our most popular silhouettes are available in high-contrast combinations from the Leather Exterior Collection. // The Repeat Stripe Collection features a mix of reflective + matte bands of color in "repetition" yet yields one-of-a-kind wallets. Featuring a textile designed by Hella J.

Each minute the RFID chip in your wallet sends 120 signals. An RFID reader can capture the signal + save the data. Our stainless steel fabric traps that signal and the data safely inside the wallet.

Hella Jongerius finds a way to express a sense of individuality in a time when mass-production is ubiquitous. She blends traditional with contemporary in this textile design for Maharam, New York.

Each strand of stainless steel thread is 3x thinner than a single sheet of paper. Interwoven strands present endless angles of reflection producing a truly brilliant material.

**DESIGN + STYLE** / The debut of the stainless steel wallet marked the moment anti-theft technology became a sportswear textile. We find ourselves at the forefront of emerging trends as well as emerging technologies. Testing materials for new personal accessory concepts was part of the original premise that inspired us: developing accessories for modern living.

# INDUSTRIAL INDIVIDUAL

Our Repeat Stripe Collection features the Repeat Classic Stripe textile designed by Hella Jongerius. Commissioned by Maharam, New York, Repeat Classic Stripe is cataloged at museums + institutes across the globe.

Repeat is a continued theme in Hella's work: the creation of individuality within serial production. This textile has an unusually long cycle of repetition, introducing random order + the opportunity to create one-offs within a collection.

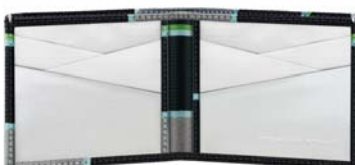

Designer Hella Jongerius has become known for the special way she fuses industry + craft, high + low tech, tradition + the contemporary. Her company Jongeriuslab, currently located in Berlin, produces her own projects and projects for clients.

# ORIGINAL COLLECTION

A handle as smooth as silk. The Original Collection is composed of our custom stainless steel textile and is accented with a casual silver nylon at the spine + along the interior.

The Studio is the design center at STEWART/STAND: A multidisciplinary environment with a diversity of design influences.

We designed + developed our first stainless steel wallet in Brooklyn, NY. A recent relocation to the West Coast has brought new sources of inspiration.

From the press: Our wallets have been called: "the perfect gift for Edward Snowden", "not your father's wallet", "an inventive product", etc...

**THE STUDIO /** We design for modern living - a travel savvy, technically inclined lifestyle. We have gained a reputation for producing innovative accessories for men + women with quality + craftsmanship that is unmatched in material + style. A sincere interest in the search and development of new textiles ensures an exciting future full of new and original designs.

## » CARD CASE «

Full spectrum of color options in full grain leather. Our Business / Credit Card Cases snap closed to keep your credit cards safe + your calling cards looking crisp and professional.

WIRED Magazine features our stainless steel wallet design in their Gadgets section: "Sleek + Sturdy Steel Wallet Keeps RFID Hackers at Bay" by Brendan Spiegel.

This RFID enabled information is not protected and can be accessed without your knowledge: full name, billing zip, cc number/identification number, exp date, visual passport data.

STEWART/STAND gladly accepted the Men's Journal title of "BEST WALLET" : For keeping your cards safe from Identity Thieves."

**ID THEFT + RFID** / With an emphasis on security, we are credited as being the first + popularizing the importance of privacy and data protection in personal accessories. An inherent benefit of the material, not a discreet lining, consumers like the fact that our wallets "look like a shield, but are supple like leather." Our design prevents radio waves carrying your personal information from escaping the wallet. Every STEWART/STAND® wallet protects from Identity Theft.

# COLOR BLOCK [ LIGHT ]

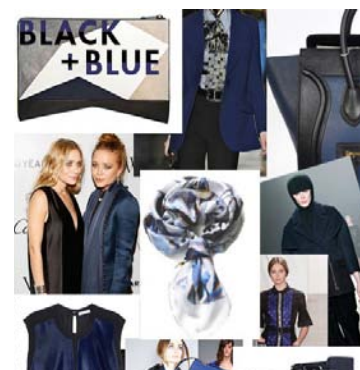

**Bold + pastel hues blend together in this bright + cheerful collection of women's accessories. Our signature crossed card slot design adds excitement to the interior. Stainless steel is paired with the finest quality full-grain leather - elegant and strong.**

Call it mint, pale jade, pastel green, but to call it a hint is a wild understatement. A refreshing pastel tone to cool things down. Don't pass up the chance to wear the color of the hour.

What better way to stand out than to opt for high-contrast stripes? Top stylists + designers are feeling inspired to move beyond the classic French-Riviera t-shirt into bold bands of black + white.

For those who feel a golden rule has been broken, our sympathies... if you can't beat 'um join 'um! Set aside your fears + clash it-up.

**ON TREND /** Transforming patterns into textures, creating a lasting impression in our steel textile. The reflective nature of our stainless steel fabric adds a unique element to our collections. Adding depth generates a dynamic dance of shadow + light along the surface. Adding soft + bold colors allows the stainless steel to shine.

# COLOR BLOCK | BLACK |

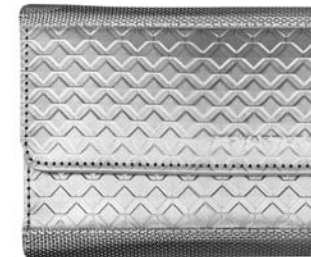

Rich black is paired with our bright stainless steel. A bold contrast. We've also combined our classic black with a bright shade of blue. Stainless steel is paired with a refined + durable full-grain leather.

The ultra thin design is flexible, soft to the touch, and offers a unique identity theft benefit.

Extreme Textiles Designing For High Performance, by Matilda McQuaid - The Cooper-Hewitt, National Design Museum exhibition book.

This wallet is composed of the most widely used screen in the industrial world. It has diverse industrial applications - petrochemical, architecture, aerospace, and automotive to name a few.

**FASHION + TECHNOLOGY** / The discovery + development of our signature stainless steel material coincided with the seminal exhibition at The Cooper-Hewitt National Design Museum in New York. The exhibit was titled: Extreme Textiles. We began developing the material for our specific applications and fell in love with both the touch and handle of the material. We sensed a tremendous opportunity at the intersection of fashion and technology.

# » CHROMA COLLECTION «

A custom alligator texture is paired with beautiful full-grain leather in cheerful hues of berry, yellow + pale jade. Inside and out, these wallets are colorful + fun.

Sou Fujimoto, Cloud - Serpentine Pavilion Structure. Stainless Steel + Glass. 2014 — Cube frames form a visual description of discipline, precision and order. From the interior a feeling of nested comfort is perforated with glimpses of external sounds + sights.

Jeff Koons, Balloon Venus. High chromium stainless steel w. transparent color coating. 102 x 48 x 50" 2008 - 2012 — An interpretation of a classic subject: Venus. "Transposed into a twisted balloon and enlarged to a colossal scale"..."reflective magenta curves approaching total abstraction".

Picasso, Unnamed Sculpture - Chicago Daley Plaza Steel, 50' tall. 1967 — A monumental cubist sculpture, reducing the subject into component planes and geometric solids; cubes, spheres, cylinders, and cones. Built in cooperation with the American Bridge Company division of the US Steel Corporation.

**STEEL APPEAL /** Thrilling. A handle as smooth as silk, yet the strength to stop meteor debris shooting through space. An unexpected juxtaposition. The idea of designing a line of personal accessories with this technical textile is intriguing + appealing. This is what we call « Steel Appeal » which we feel is as specific to our collections as to other design works where steel is fundamental to it's excitement. Our steel embodies theft protection technology in a natural + unharmlful way. A material story: beautiful, strong, eco friendly, technically inherent.

# MONOCHROME COLLECTIONS

A sophisticated monochromatic palate. Geometric + natural textures are impressed in the stainless steel. When paired with a grey full-grain leather or nylon, a silvery metallic look is achieved.

This is designer vegan. It's a fact - our best selling wallets are vegan.

Eco-Luxury. We believe in environmentally responsible manufacturing using materials + processes that are safe for the planet. Sold worldwide, our designs meet the highest standards in consumer safety.

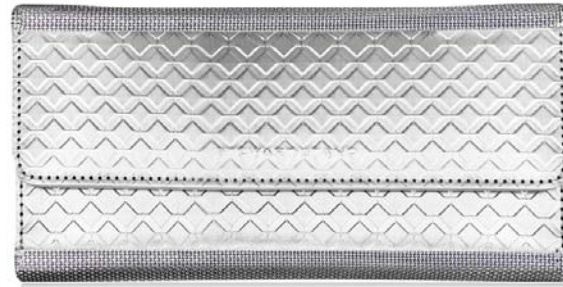

State of the art equipment + exceptionally talented tailors ensure the ultimate in quality. We have been working with the same technical tailors for the past 10 years + are proud that our wallets are cut + sewn by the finest textile engineers.

**ECO-CONSCIOUS** / The STEWART/STAND® Stainless Steel Wallet is an eco-conscious design. 100% of stainless steel is recyclable + our wallets are made with 85%+ post-consumer recycled materials. We offer a wide variety of elegant options of earth friendly designs, as well as dozens of vegan products for men + women.
